Claresholm Boy Wounded

Mr. John Edlund received a wire this morning, stating that his son, Carl, was wounded on April 14th—gashed wounds, penetrating the back. Carl enlisted 14 months ago and left for overseas last fall. He was attached to the Artillery.

No Time to Lose

Sgt. Holt, who has been recruiting for the Mounted Police, left on Friday for Nanton and Stavely. He will be in Claresholm again Saturday evening and is anxious to see anyone wishing to join the force. This is a fine opportunity for the Claresholm boys to go together in a regiment whose fame is world-wide. As far as reports, the force will be recruited to full strength within a few days.

Claresholm Boys Buy

To Sign Up

The R. N. W. M. Police made a big haul of recruits at Claresholm during the week. Over twenty are said to have joined the force. Within a few weeks they will be on the way to France. We admire them for their pluck and wish them good luck when they get to the front.

The following is the list of names: Wm. Robinson, Earl Atkinson, Jim Nelson, George Johnson, Lloyd Morrison, Dick Trusler, Russell Haig, Angus MacIntosh, Bert Keichap, Fred Symonds, Gilbert Hymond, Fred Brown, Bill Goss, Mayell Thompson, Wm. Mayo, Otto Fields, Jas. McMillan, Geo. Burrows.

Died

Capt. John Fleming, of Halifax, died very suddenly of complications following a severe attack of pneumonia on March 27th. On March 31st his wife, who had been very ill for many months, died. Mrs. Fleming had a daughter, Mrs. H. J. Brown, of Calgary, with whom all winter she resided her mother. The other surviving children are Mrs. W. L. Carson, of Halifax, and Mrs. Neil Gray, of Meadow Creek, Alta.

Don't Bother The Shadows

What would become of us if every place should be closed, every taking machine broken, and every pleasure automobile buried in the garage? The shadows of war are deep enough, we're known. What would they be if we closed every theater, and every amusement hall? It would be the end of the world. Let us hope that we can or to take the extreme suggestion that the automobile provides and that Americans, with their sedentary sticks of interest, did so very much.—Louis' Weekly.

Land and Seaboard

Freddie Richards, of Glenrose, is spending a few days in Claresholm, Alta., now, visited Monday today (yesterday).

Miss Mabel Milner and Miss Ethel Milner, informed from Glenrose yesterday (Tuesday),

Mr. Charles R. Morrison, is looking after the freight business in the office of Mutual Transport.

Miss Isabelle Richards, of Glenrose, passed through Claresholm, on her way to the coast.

The Great Red Project is now considering the question of land and its census. An order, authorizing the construction of both, is expected in a few days.

The telephone indicated by the Post Office to the telephone company of Glenrose has a "restriction for local telephone service to prevent calling out-of-

National Registration

The plan of the National Registration Board for a complete registration of the man and woman power of Canada have been approved by the cabinet and an official announcement will be made today. Every male and female between the ages of 16 and 60 will be compelled to register on a day in the month which has not yet been fixed. It will likely be the first Saturday in the first week of that month. There are drastic regulations which will make it necessary for every one to comply with the orders.

WILL GET THEM ALL

It is understood, for instance, that a person without a registration card will be unable to travel on a railway train and will be unable to draw his pay or receive a pension for a firm. He or she will lose the right to vote. It is planned to complete the registration in one day and the election machinery in a certain extent will be used. The country is divided into some seventeen districts with a registrar in charge of each district. There will also be county registrars conforming to electoral ridings.

ENORMOUS TASK

There will be registration officers in every town in Canada, although the polling booth of last election will not necessarily be used. It is proposed in many instances to use the schools. However, this may not prove to be feasible. While the districts and county registrars will be paid, much of the help will be voluntary. The women's organizations, for instance, will likely take charge of the registration of women. The labor unions are heartily co-operating in the plan of the board.

A New Doxology

Two empires by the sea,
Two people, Israel and free,
One nation reigns;
One voice of ancient fame,
One tongue, one faith, we claim;
One God, whose glorious name
We love and honor.

This hymn was written by an American lady in England and has been sung at various public meetings in the old country with great enthusiasm. It may be due to the time of "America" or "God Save the King."

Every Acre In Canada Must Be Planted

The importance of necessary man in creating wheat on the prairie is avert famine is the subject of a special message of the Hon. T. A. Carter, minister of agriculture, to the farmers.

The message, he says must be impressed, and every field capable of growing wheat must be planted.

The message reads:

"I desire to call the attention of the farmers of Canada to the grave need of planting every acre of land in wheat that is in shape to grow it. The need will be very great. I know from practical experience the difficulties thousands of our farmers are up against through the trouble they have getting suitable farm labor.

"There should not be a man idle to Canada today who is physically fit to work. The law against idleness should be enforced, the same as any other law. With such help as is to hand, better planning and more cooperation between neighbors we may easily meet the emergency now that comes daily of that awful grim struggle now being fought in France and Flanders brings home to us clearly and unmistakably that fact—that after almost four years of war human liberty is still in the balance.

MUST PRODUCE MORE

"The time for action is urgent, and they must be the full limit of our power be sent. Their places at home must be taken by those who remain."

"Despite the difficulties, we must produce more food than we have ever done before. Set apart all your land fit for growing crops, and plant as much wheat as you can. Plan to do one-half more next year. Plan to bring as much new land on your farms under cultivation for another crop as possible and thus increase your acreage for next year. It will be needed then just as much as now."

Is It Not Curious?

A grade cow eight years old near Woodstock, Ont., that freshened last November, has given in eight months 13,092 pounds of milk, testing over 3.2 on the average, and having a spot cash value of \$285.57. She is still giving 34 pounds of milk a day, and is in November again. Such a cow is a source of personal pride to her owner, who weighs the milk from each cow he has, because he finds it pays.

But is it not curious that many dairymen never bother to weight it, and so remain quite hazy as to each cow's performance? It is curious, too, that so many men, who have a mother with a herd, are one of which she even a remote chance of giving one-half of what this fine cow gave in eight months.

Milk record forms will be gladly supplied free of charge by the Dairy Division, Ottawa, to any one entering prizing enough to weight and find out what a cow actually produces in return for all the eats. Make each cow pay—C. F. W.

Don't Grumble To Waiters

Don't grumble when you are told in the restaurant that you "haven't had this dish on the menu before." This is against the new regulations. Get used to them and be glad your having things so easy.

White Feather Farm Slackers

The "farm slacker" is no better than the man who would not get into khaki when the call came. He gets into the same kind of "white feather" the man who continues to live indolently dawdling through the day and dicing through the night.

The Canadian Union of Municipalities will meet in Victoria, B. C. on July 9-10-11.

Your Oil Opportunity**In a Real Ground Floor Proposition**

In order to secure sufficient funds to start our drilling operations we are offering our stock at far below the par value. We absolutely guarantee to raise the price of this stock as soon as our operations start on our leases. You are thus afforded an opportunity to double your money within a short time. Our advice is to buy now at the present price of 5 cents per share.

Our leases are in four fields, including one piece of property in the truly famous Warm Springs Dome. This is proven ground and we should bring in a well timed investment without any difficulty. The other three fields are in the young oil fields of Carbon Dome, Carbon Dome of Montana and the Clark Fork Dome in Wyoming, as well as a large acreage in proven Kansas fields. Oil from either one of these structures will mean a fortune for our stockholders.

**Get Behind the Wheel of a Ford and Drive**

TRY it just once! Ask your friend to let you "pilot" his car on an open stretch. You'll like it, and will be surprised how easily the Ford is handled and driven.

If you have never felt the thrill of driving your own car, there is something good in store for you. It is vastly different from just riding—being a passenger. And especially so if you drive a Ford.

Young boys, girls, women and even grandfathers—thousands of them—are driving Ford cars and enjoying it. A Ford stops and starts in traffic with exceptional ease and smoothness, while on country roads and hills its strength and power show to advantage.

Buy a Ford and you will want to be behind "the wheel" constantly.

A New Doxology
Two employes by the sea,
Two people, levi and levi,
One another's voice,
One page of ancient tales;
One tongue, one faith, we claim;
One God, whose glorious name
We love and praise.

The above was written by an American boy in England, and was sent home to his mother in America together in the old country with great enthusiasm. It may be sung to the tune of "God Save the King."

Every Acre in Canada Must Be Planted

The imperative necessity for an increased wheat crop this year to avert famine is the subject of a special message of the Hon. T. A. Crerar, minister of agriculture.

Mr. Creran says it must be increased, and every field capable of growing wheat must be planted. The message reads:

"Let me again draw the attention of the farmers of Canada to the grave need of planting every acre of land in wheat that is in shape to grow it. The time is now to get good knowledge from practical experience the difficulties thousands of our farmers are up against through the trouble they have getting suitable farm labor.

NOT A MAN IDLE

"There should not be a man idle in Canada today who is physically fit to work. The law against idleness has been in force since 1914, and as far as other laws go, with such help is to be had, by better planning and more co-operation between neighbors we may shake up the deficiency. The news that comes daily of that awful grim struggle now being fought in France and Flanders brings home to us clearly and unmistakably this fact that although the cause of war human liberty is still in the balance.

OUR FARMERS WERE

"The call for more men is urgent, and they must to the full limit of our power be sent. Their places at home must be taken by those who remain. Despite the difficulties, we must produce more food than we have ever done before, and we must all do our best for growing crops, and plant as much wheat as you can. Let me add one word about next year. Plan to bring as much new land on your farms under cultivation for another crop as possible and thus increase your acreage for next year. It will be needed then just as much as now."

Is It Not Curious?

A grade cow, eight years old near Woodstock, Ont., that freshened last November, has given in eight months 13,092 pounds of milk, testing over 3.2 on the average, and having a spot cash value of \$288.57. She is still giving well, and is due to give again in November again. Such a cow is a source of perennial pride to her owner, who weighs the milk from each cow he has, because he finds it pays.

But is it not curious that many dairymen never bother to weigh it, and so remain quite easy as to each cow's output? They are so used to it, that so many are content to bother with a herd not one of which has even a remote chance of giving one-half of what this fine cow gave in eight months.

Milk record forms will gladly supply free formularies by the Dairy Division, Ottawa, to any one entering competition, who would find in what each cow actually produces in return for all the care. Make each cow pay. —C. F. W.

White Feather Farm Slackers

The "farm slacker" is no better than the man who would not get into khaki when the call for recruits came. The women must "white feather" the man who continues to live ineffectually dawdling through the day and dicing through the night.

Your Oil Opportunity

In a Real Ground Floor Proposition

In order to secure sufficient funds to start our drilling operations we are offering our stock at below the par value. We absolutely guarantee to give the proper value share as soon as our operations start on our leases. You are thus offered an opportunity to make a large sum of money within a short time. Our advice is to buy now at the present price of 5 cents per share.

Our leases are in four fields, including one piece of property in the justly famous Warm Springs Dome. This is proven ground and we should bring in a well there immediately without any difficulty. We will also purchase the Mudfish-Lesson Dome of Wyoming, the Carboniferous of Montana and the Clark Fork Dome of Wyoming, as well as a large acreage in proven Kansas fields. Oil from either one of these structures will mean a fortune for stockholders.

Get Behind the Wheel of a Ford and Drive

TRY it just once. Ask your friend to let you "pilot" his car on an open stretch. You'll like it, and will be surprised how easily the Ford is handled and driven.

If you have never felt the thrill of driving your own car, there is something good in store for you. It is vastly different from just riding—being a passenger. And especially so if you drive a Ford.

Young boys, girls, women and even grandfathers—thousands of them—are driving Ford cars and enjoying it. A Ford stops and starts in traffic with exceptional ease and smoothness, while on country roads and hills its strength and power show advantage.

Buy a Ford and you will want to be behind "the wheel" constantly.

For Farmers Only

A handbook for Farmers is a very useful booklet that has just been issued by the commission of Conservation. It treats of tillage, use of manures, seed selection, clover growing, the raising of weeds and grass, pests, and other farm subjects in an informative as well as popular manner. The quantity is limited and therefore will be supplied on request only to bona fide farmers.

One of the amusing features of the session occurred when Mr. Weir, Mrs. McKinney's colleague, made a long winded speech of which only the "Farmer" is copied below. He was leaving the house plumped in pajamas. Mrs. McKinney came to the room, and put in about two-five words clear and logical, what Mr. Weir had been trying to say in 2,000."

A New Wheat

The Central Dominion Experimental Farm, to which we always owe much gratitude, has produced

a new variety of wheat, known as Dr. Charles E. Sander's, produced another new variety, Red Fife, which

wheat possesses characteristics in ripening and other qualities midway between Marquis and Prairie.

It is hardy, bears well, is free from head-blossom, possesses hard red ker-

nels, gives a fair yield, and makes flour of good quality, suitable for color and strength. Bread made from it ranks in the first class. This wheat is now being grown in between Downy Riga and Red Fife. Ruby is, however, recommended only where Marquis will not ripen.

A Royal Compliment

Solomon J. Solomon, the London artist, has received the intention of his being knighted, by King Edward VII, who will be crowned next month. Mr. Solomon is rich and famous throughout the world. Some time ago, and admission to the Royal Academy had not yet given him the title of "Sir," he had the coveted "R.A." to his name.

At an academy exhibition in those days, he had a painting which was excellent that it cast all those in the shade.

He is now the king, pausing before the masterpiece, declared:

"Exquisite! And yet Solomon, in all glory, is not R.A. like one of these."

With Holloway's Corn Cure is applied to a corn or wart it kills the roots and the callosity comes out without injury to the skin.

Old Law Shredded

A Boston paper exemplifies that although millions of pounds of fish come into that port every day—diseases greater than ever—no one price rises so rapidly. This is an illustration of the law of supply and demand as applied to fish.

Between Downy Riga and Red Fife, Ruby is, however, recommended only where Marquis will not ripen.

Playing Safe

Private Did Not Wish Any Public
Under Any Circumstances

An officer in the British army who was thoroughly disliked by his men, was returning to the barracks one night, when he slipped and fell, and got into deep water. A private happened to see the occurrence, and went to the officer's aid. The latter was very confused in his thanks and asked his rescuer if he would reveal him.

"The very best way you can reward me," replied the private, "is to say 'nothing' about it."

"Why, my good fellow," questioned the astonished superior, "then why don't you wish me to say nothing about it?"

"Aye, if the other fellows knew I put you out, they'd know who soon chuck me in, and the frank response."

How He Worked It

First Father—"All sons are very ungrateful. I have sent mine to college, and written him every week, but he never has time even to send me a postcard to say how it is getting on."

Second Father—"Oh, I can always get a letter from my son."

First Father—"Well, I write to him, saying, 'Dear John, I enclose one thousand dollars.'

Second Father—"Well, I don't enclose that, that's all!"—Edmonton Bulletin.

Wilhelm Not Napoleon

The great German Emperor died at St. Petersburg, Constantinople and London. The Kaiser set out to conquer the world, and almost succeeded, but he failed to do so far as to carry his flag to the capitals of some countries, such as France, Belgium, Serbia, Montenegro and Rumania. He dreamed of a great Empire, but Bagdad was in the hands of the British and he seems less successful than Kitchener. As far as Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of those who have known its benefit.

A Welshman's Prayer

A simple-minded man in a Welsh coal valley is a character in his way, and is a member of the church, and in the devotional services of his chapel. His prayer the other night was: "Lord, I thank you for the fact that you have not continued with me so long as I have been able to do this far to carry his flag to the capitals of some countries, such as France, Belgium, Serbia, Montenegro and Rumania. He dreamed of a great Empire, but Bagdad was in the hands of the British and he seems less successful than Kitchener. As far as Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of those who have known its benefit.

German Countess
To Expose Junkers

Years Before the War Broke Out
the German Agency Against
the Junkers

The Friends of German Democracy in New York announce that revelations showing how for years before the war the Junkers, an autocratic school against the United States, were in the possession of the German Countess, now the widow of a German count, the Countess was exposed. The German Countess was in opposition to the views of the pan-German junkers, to which group the Countess von Krolock was preparing to give her experiences, contained in her book, "My Life with Death," which she had kept secret, to the American public.

The Countess says she wrote an article in the New York Times, a man ruling class for an American magazine. It was published under a pseudonym, and the author of the article was disengaged from the article and the Countess.

The Countess, who lives in the Buena Vista apartments, Riverside Drive, New York, says she has been writing to the American public.

"I was the only member of the immediate court who escaped the catastrophe at Austria. In the first year after the war, the court became a bitter enemy to the United States, and amounted almost to an obsession. On this point I had many disagreeable experiences."

"I always dared to speak my mind freely and I always was outstanding in our country. When the Kaiser received us I refused to be muzzled and exerted my right to free speech."

Inauguration of Musical Examina-
tion Has Been of Great Benefit

Of all the pioneer work done in Canada, nothing has been more productive of good than the inauguration of the Toronto College of Music, which is now in its third year. H. T. Hamilton, whose name needs no introduction to the Canadian public, has established a musical school, one of the foremost musical institutions in this country. A system of study is established, whereby students from distant Toronto are afforded the same opportunities as those in the city. The examinations are held at midsummer, and the results are published in the box of Dr. Hamilton's Pills today.

13—CHEESE

War and Food

No. 13—CHEESE

Always noted for its nutritious value, cheese is doubly important now as one of the most satisfying of substitutes for the beef and bacon which have been taken from the table in most Canadian homes.

Feast or twenty years ago the cheese market in Ontario was in dairying was based on its volume of cheese production. But this basis of cheese production has been overtaken by other lines of dairy industry than cheese-making have made enormous strides in the last few years. Chief of these are the whole milk and powdered and condensed milks.

Despite the growth of these rival trades, however, cheese is still the chief product of Ontario, and the value of the cheese output of the province in 1916 was \$23,700,000, or \$1,000,000 more than the record of the year before and up to \$9,000,000 more than for 1915. This increase in cheese production has increased her export of cheese since the outbreak of war by upwards of 400%.

Rich in protein there are few more sustaining than cheese, if it is well made, and the extent to which the majority of people regard it as a substitute for other foods needs for explanation. Other food products have as much nourishment as a large portion of meat. It is extremely nutritious, and might be generally used.

Usually around the farm there is a cheese-making plant, and the contempt with which the majority of people regard it is a definite factor in the popularity of cottage cheese; this method of converting skim milk into a more nutritious food is simple and safe, and it is wholesome and delicious.

Canadian cheese may justly be termed one of the war foods of importance, and the contempt with which the majority of people regard it is a definite factor in the popularity of cottage cheese; this method of converting skim milk into a more nutritious food is simple and safe, and it is wholesome and delicious.

Killing Without Injury

An Irish barrister was counsel for a man whose cow had been killed by a bull. The lawyer said: "If the bull had been run as it should have been run, it would have been killed, but it would have been rung, or if the whale had been blown as it ought to be, it would not have been injured when she was killed."
